Preparing for Mandatory PIAs

Canada's public sector privacy rules are being rewritten, and privacy impact assessments are becoming a legal requirement rather than good practice. Valencia helps organizations identify which rules apply to them, when each takes effect, and what a defensible PIA process looks like.

OUR PIA READINESS SERVICES

Gap Assessment

Assess your current privacy practices against the rules that actually apply to you, identify where assessments are missing, and establish your baseline.

Remediation

Build a repeatable PIA method, breach reporting protocols, and privacy governance.

Documentation

Develop clause-cited assessments and records that hold up to Council, a Commissioner, or an access request.

Preparation & Support

Run readiness reviews ahead of each in-force date and support your first assessments.

WHO WE HELP

Ideal for organizations that:

- Are MFIPPA institutions facing mandatory PIAs on 1 January 2027
- Are FIPPA institutions already subject to the duty since 1 July 2025
- Operate across provinces and face several privacy regimes at once
- Are building a PIA process from zero, with nothing to amend

Valencia believes in an empowered and safe digital world for everyone. This goal is the guiding principle of what we do.
